SECONDARY MATHEMATICS

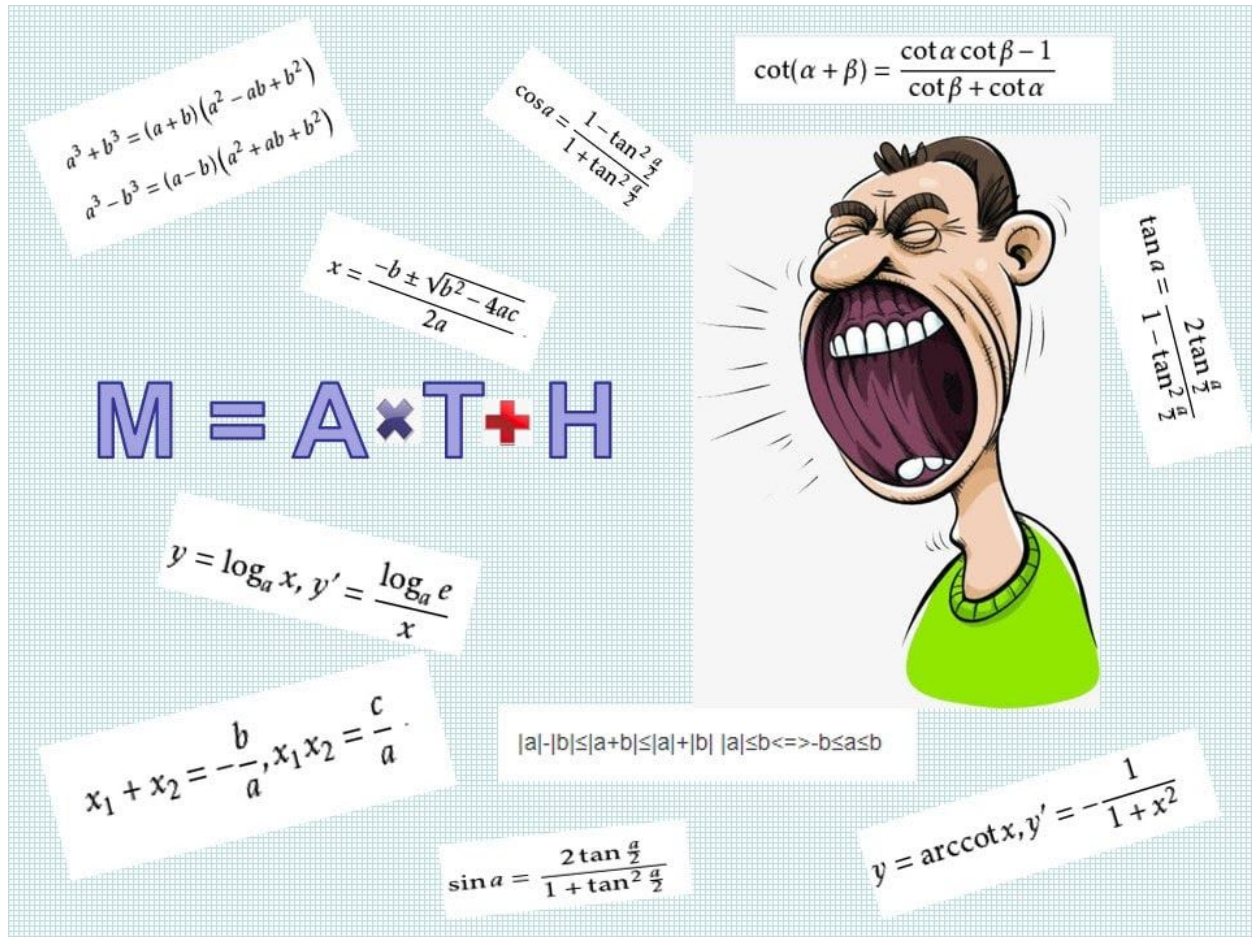

Welcome to the Mathematics Department.

<https://bistmaths.weebly.com/>

In Mathematics we have a website that celebrates our students' achievement and has links to lots of interesting Mathematics websites and puzzles. Check out the link above and feel free to ask any questions.

Algebra.

Mathematics at Secondary school is similar to Primary school in lots of ways, the major difference is Algebra. At secondary students study a lot of Algebra, 2/3rds of the Mathematics course at IGCSE is Algebra based in one way or another.

What is Algebra?

Algebra is where you use symbols, usually letters of the alphabet, to solve problems. These letters, or symbols, are placed in the problem to show an unknown. For example, the problem below has the letter 'a' in the place of an unknown number. Here is an Algebra lesson to work on, please let us know how you get on!
